Cougartron Weld Cleaner tilbehør:

PT-800W – Marking and Etching Stencil Printer – 18-36mm tape

PT-800W is a practical and reliable printer for production of stencils for electro-chemical marking and etching. Use the printer to create quality single-use stencils 18-36mm wide. PT-D800W is equipped with a convenient keyboard for easy typing and design. The printer is also connectable to PC and smart devices via USB and WI-FI. Features: Prints durable labels from 18mm to 36mm in width - 360dpi print resolution for crisp text, images and Barcodes - High-speed printing of up to 60mm per second - USB and Wi-Fi connectivity - Professional laptop-style keyboard for easy and fast typing.

Article number: WELC4339

Etching Tape Cassette – 18-24-36mm

Etching tapes to fit Brother type printer for producing single use stencils for marking metal.

Article number: WELC4014 (18mm x 3m)

Article number: WELC4015 (24mm x 3m)

Article number: WELC4016 (36m x 3m)

Cougartron ProPlus Etching Set

ProPlus etching set turns your Cougartron ProPlus weld cleaner* into an effective marking and etching machine for stainless steel. Etch and mark logos, product names and model codes easily by replacing the weld cleaning brush with a special marking head.

Article number: WELC4035

CGT-S1 Stainless Steel Marking Fluid – 0,5L

CGT-S1 is a specialized marking fluid for electrochemical marking of stainless steel surfaces.

Article number: WELC3115

MK612 Electrochemical Marking Machine

MK612 is a portable electrochemical metal marking machine with a variable voltage technology (6-12V). By lowering the voltage from 12 to 6V, you will be able to mark larger metal surfaces – without losing color consistency. All your markings will have a uniform dark appearance, no matter their width. MK612 is lightweight, compact, and delivered in a practical carrying case for easier use on- and off-site.
The machine offers fast, safe, and permanent marking of:
• Logos • QR codes • Serial numbers • Part names and codes • Maker's marks
Suitable for all conductive metal types including stainless steel, mild steel, aluminium, brass, copper, zinc, and even titanium.

Cougartron Weld Cleaner tilbehør:

CGT-350 Weld Cleaning Fluid – Non Dangerous – 5L

CGT-350 is a milder version of CGT-550 and gives great cleaning results with both TIG and MIG welds.

Article number: WELC3050

CGT-550 Weld Cleaning and Polishing Fluid – 5L

Cougartron CGT-550 weld cleaning and polishing fluid is for cleaning, polishing and passivating stainless steel welds and surfaces after welding and fabrication.

Article number: WELC3048

CGT-N1 Neutralising Fluid – 5L

CGT-N1 neutralising fluid is used to effectively remove all traces of acidity from metal surfaces after weld cleaning.

Article number: WELC3114

Cougartron Wand – With 6mm Parallel Thread

Cougartron wand connects to the weld cleaner handle and it is used to hold the brush and the sliding shroud.
The item should be replaced immediately if damaged.

Article number: WELC2056

Double Brush Sliding Shroud

Double brush sliding shroud is used when two brushes are mounted on the same wand with the use of the double brush adaptor.
The function of the double sliding shroud is to protect the brush and the adaptor – and to control the length of the brush.

Cougartron Weld Cleaner tilbehør:

Cougartron Powerbrush – Weld Cleaning Brush – Copper Crimp
The popular Powerbrush has been developed and fine-tuned to get the best performance from your Cougartron Weld Cleaner.
Sold in snap-off packs of 10 pieces.

Article number: WELC3101

Cougartron Superbrush – Weld Cleaning Brush – Hex Crimp
10-pack.

Article number: WELC3145

Cougartron Flat ThunderBrush III – 10-pack
Cougartron Thunderbrush III is an effective and thick brush to be used with Cougartron weld cleaning machines. The brush is 4 times thicker than similar models and has a dense fiber structure – you don't have to move it in different directions to achieve a desired result.

Article number: WELC3091

Cougartron Wand with Twist Shroud - Single Brush
Now you have more control over your brush than ever – this unique twist design means that you can precisely choose brush length. Features: No more problems with damaged brushes - Increase brush life by up to 100% - Work up to 50% faster - Replaceable shroud - Components heat resistant to 327°C.

Article number: WELC2226

Cougartron Wand and Sliding Shroud Assembly - Single Brush
Wand and the sliding shroud are essential for proper functioning of the weld cleaning brush. The parts are sold individually and as a part of the assembly. Wand and the sliding shroud assembly can be used on non-Cougartron weld cleaners that are not build to hold the sliding shroud.
